OBJECTIVE

A passionate and growth-driven senior software engineer bringing over 10 years of hands-on experience architecting and developing robust, scalable, and cloud-native software solutions using Enterprise Java, Kotlin, and Scala across a spectrum of industries- including Payments Processing, Smart Lighting (IoT), Healthcare, and Telecommunications. Known as excellent team player that creates impact. Proven track record of spearheading development activities of enterprise teams, performing leadership roles, executing complex and business critical projects.

Relevant Skills

Java	Kotlin	Scala	Spring Boot	Spring WebFlux	Docker	AWS	MongoDB	PostgreSQL	Neo4j	Redis
Dynamo DB	Hibernate	Akka	Http4s	Github Actions	Argo CD	Terraform	MQTT	Datadog	Gradle	JWT
Object Oriented Design	Functional Programming	Reactive Programming	Backend Engineering	Payments Processing	Datadog					

Professional Experience

Unzer GmbH | Berlin, Germany

Senior Software Engineer, OCT 2022–Present

- Designed and implemented scalable, secure payment processing solutions for credit cards and digital wallets, with a strong focus on high reliability, low latency, and seamless scalability to accommodate ~60K payment requests and ~120K 3D Secure authentication requests daily.
- Improved credit card payment acceptance rates by 5% with features such as 3DS exemptions, Dynamic Acquirer Routing, and integration with advanced 3D Secure provider servers.
- Architected and maintained distributed backend infrastructure with advanced error handling, leveraging JWT authentication for secure access control and KMS-based encryption/decryption for sensitive data.
- Developed robust, well-documented APIs and enabled seamless integration with external payment processors, acquirers, schemes and security solution providers.
- Ensured strict PCI-DSS compliance and implemented advanced security best practices, including tokenization, HMAC hashing of PANs, secure credential storage, and regular vulnerability assessments.
- Collaborated with cross-functional teams and external partners to optimize payment integrations, monitor system performance, and drive ongoing improvements through comprehensive technical documentation, detailed metrics and analytics.

Tools & Technologies: Kotlin, Spring Boot, Spring WebFlux, Redis, MongoDB, Docker, AWS, Kubernetes, ArgoCD, Github Actions, Open Search, Datadog

Signify Innovation Labs (Philips Lighting) | Bangalore, India

Development Engineer, May 2020–SEP 2022

- Led a 7-member development team for the Interact Office product backend, managing millions of lighting points globally and steering end-to-end software development from architecture to maintenance.
- Collaborated with Product Management to define product roadmaps and features, delivering impactful solutions within estimated timelines while transitioning knowledge offshore for over 50% cost savings
- Excelled in multiple roles—Lead Developer, Product Owner, and Scrum Master—to address evolving team needs, and drove significant process improvements, including a 50% reduction in PR backlog and enhanced automated testing.
- Mentored junior team members and mastered Scala and emerging technologies while continuously delivering on challenging, high-impact responsibilities.

Tools & Technologies: Scala, Http4s, Finatra, Cats Effect, Akka, MQTT, Neo4j, PostgreSQL, Docker, AWS, Kubernetes, Terraform, Jenkins, Kibana

Legato Health Technologies (Anthem Inc.) | Bangalore, India

Senior Software Engineer, JUN 2018–MAY 2020

- Designed and delivered scalable, high-availability microservices for cloud deployment, following 12-factor app principles and collaborating with cross-functional teams throughout the entire development life cycle.
- Championed Agile and DevOps practices to streamline modern application development, earning recognition as 'Star Performer of the Year 2018' for exceptional performance.

Tools & Technologies: Java, Spring Boot, MongoDB, MySQL, Docker, Docker Swarm, Jenkins, Splunk

IBM India Private Ltd | Bangalore, India

Associate Software Engineer, MAR 2015–JUN 2018

- Played a key role in migrating applications to microservices architecture, developing and maintaining robust SOAP and RESTful web services, and ensuring quality through thorough unit testing, comprehensive documentation, and code reviews.
- Supported production deployments and post-release monitoring to ensure system stability, while actively collaborating with senior developers to resolve issues and continuously enhance technical skills.

Tools & Technologies: Java, Spring, EJB, SOAP, REST, Oracle, Linux

EDUCATION

Rajiv Gandhi University of Knowledge Technologies, Basar, India

Bachelor of Technology, Computer Science and Engineering, June 2014

Honors: One of the top 10% students of the class of 2014 (CGPA: 8.5/10)

Languages

- English – Native Level Proficiency
- German – B1 Level Proficiency
